PROJECTS

Pandemic Tracker - Live Demo Tech stack used - ReactJS, HTML, CSS, JS, Firebase	June 2025 - July 2025
- Engineered a responsive full-stack web application using ReactJS and Node.js to track and display real-time global and regional pandemic metrics. - Integrated a public REST API alongside Chart.js to transform raw and real-time data into dynamic, accessible visual charts for end-users.	
Live Chatting Website - Live Demo Tech stack used - ReactJS and Firebase	Sep 2024 - Oct 2024
- Implemented Firebase for robust backend data management, enabling secure, real-time message delivery and data synchronization. - Designed a highly responsive and intuitive user interface with HTML and CSS, resulting in an optimized and accessible chat experience across mobile and desktop platforms.	

HACKATHON

Smart India Hackathon - Museum Ticketing System using CHATBOT	Sep 2024
- Built a multilingual web-based museum ticketing system with an integrated chatbot that enabled users to book tickets seamlessly improving accessibility and user engagement. - Gained hands-on experience with tools like Tailwind CSS and qualified the Pre-Qualifiers round.	

ACHIEVEMENTS

- Hacktoberfest 2025 : Contributed to open-source projects – GitHub
- Current rating: 1620 – LeetCode
- Solved 650+ problems on LeetCode (Java) – LeetCode
